

Claims

The embodiments of the invention in which an exclusive property or privilege is claimed are defined as follows:

1                   1.    An equine dental apparatus for floating  
2                   the teeth of horses comprising:

3                   a tool body;

4                   a drive shaft disposed inside of the tool  
5                   body, wherein the drive shaft includes a first end  
6                   configured for attachment to a drive mechanism and a  
7                   second end opposite the first end; and

8                   a grinding member connected to the second end  
9                   and partially housed in the tool body, wherein the  
10                  grinding member is capable of pivoting through a range  
11                  of angles relative to the drive shaft.
